

# ILYAGU NAGDIMAEV

## Backend Developer

I think that it is impossible to know everything, so I consider the best quality to be fast learning and adaptability. I think this quality I have developed at a good level.

### EXPERIENCE

Russia  
2021 - Present

- Back End Developer**  
*Gotbit*  
  
I mainly write API for crypto exchanges. I also wrote a microservice that constantly requested statistics from different exchanges and saved it to the database. The configuration of the exchanges changed online. I also wrote an API for our service, which used the same API for crypto exchanges that I wrote.

### EDUCATION

Russia  
Sep 2018 - Jun 2022

- Master in Information Processing**  
*Bauman Moscow State Technical University*  
  
Taught python and django courses. The university also has its own small university (VK Education courses), where students study for 2 years, 4 semestres. (I am currently in my 4th semester.) There, with a team of 4 people, I made an access control and management system for QR codes in C. We made an analogue of tinder on Go. The frontend was written in Javascript without frameworks. We were also trained in testing (load, functional, etc.). I also wrote an android application for our analogue of tinder. Now we are making a react-native application that makes up outfits for stylists and users.

### PROJECTS

Drip app for dating. The main feature of the application was a similar filter.

### ACHIEVEMENTS

Bachelor of Moscow State Technical University named after Bauman

### CONTACT INFORMATION
